

Problem-Based Learning Guiding Questions

What's the unit or lesson objective?
What's the unit or lesson theme?
What is the real-life problem learners will be solving?
How does the problem relate to the learning objective and theme of the unit or lesson?
What is the scale of the problem? (Is this a problem learners can do something about?)
Other than problem-solving and communication, what central skills will learners employ in working on this problem? How?
How will you introduce the problem?
What type of research will learners need to do?
How will learners self-assess their work on the problem?
