#2.

Three-year-old Dana was still \_\_\_\_eeping. Her mom Tina thought, “By now Dana should be up and play\_\_\_\_ with her toy\_.”

Tina felt Dana’s fore\_\_\_\_. It felt warm.

Tina woke Dana up to take her \_\_\_\_perature. Her temperature was high. She had a fever of 101.2 degrees. Dana cried, “Mama, my head hurts.”

Tina made her breakfast, but Dana didn’t feel like \_\_\_\_ing. Tina gave her some juice and two children’s Tylenol.

The next morning Dana still had a \_\_\_\_ver of 101.0 degrees. She was still tired. She was achy. She \_\_\_\_d not want to play with her toys.
